SUMMARY

Detail-oriented Java Developer with a strong background in object-oriented programming and software development methodologies. Proven track record in developing scalable applications and improving system efficiency. Committed to continuous learning and applying best practices to produce clean, maintainable code that drives business success.

SKILLS

- Java
- Microservices
- RESTful API
- Spring Boot
- Oracle
- MySQL
- Salesforce
- Apex
- Lightning Web Components
- Sigma Computing

LANGUAGES

- Spanish | Native
- Ingles | Intermediate

EXPERIENCE

Jul 2025 Present	SALESFORCE DEVELOPER My Bambu Designed and implemented complex business logic using Apex, Triggers, and Lightning Web Components to optimize critical financial workflows in a fintech environment. Led integration efforts between Salesforce and third-party systems through REST APIs, including middleware connectivity for account management and Insider platform integration to enable real-time transactional event tracking. Enhanced marketing automation capabilities by supporting personalized Journey Builder campaigns and dynamic email templates. Developed enterprise-wide surveys and forms using Salesforce Experience Cloud to streamline corporate intelligence gathering and decision-making processes.
Jun 2024 Jul 2025	JUNIOR DATA ANALYST My Bambu West Palm Beach, FL, United States Experienced in data analysis using platforms such as Sigma Computing and Salesforce to optimize the performance of commercial campaigns. Specialized in creating detailed reports that drive customer service efficiency and monitoring key performance indicators (KPIs) such as response time and resolution rate. Noted for the ability to collaborate effectively across departments, identify areas of improvement by analyzing data patterns, and implement innovative tools that optimize data collection and management in internal processes.
Mar 2022 Jun 2024	DEVELOPER Codesa Medellin, Colombia Responsible for analyzing, planning, and detailed estimation of requirements. Designed and developed components adjusting the design according to needs. Provided advanced support for customer incidents. Presented project deliverables ensuring fluid communication. Supported development teams in key technical decision-making. Additionally, I actively participated in the development of applications using Web services in Spring with Java 6 and Java 8, along with front-ends in Angular, JSP, and JavaScript.
Nov 2021 Jan 2022	DEVELOPMENT CONSULTANT Softka Technologies Medellin, Colombia As a Soware Consultant, I designed and implemented reactive microservices architecture in Java with Spring Boot, applying the principles of Domain-Driven Design (DDD). These reactive, fault-tolerant, and non-blocking microservices were integrated with scalable front-end applications in React.js through RESTful APIs.
Dec 2020 Jun 2021	DEVELOPMENT APPRENTICE Intergrupo Medellin, Colombia As a development apprentice, I had the invaluable opportunity to acquire practical knowledge in the development of microservices with SpringBoot and Java. Implementing simple but robust solutions, applying good practices and principles of modular design.

EDUCATION

Mar 2019 Dec 2021	TÉCNICO PROFESIONAL EN SISTEMAS DE INFORMACIÓN Politécnico Colombiano Jaime Isaza Cadavid Medellin, Colombia
