WORK EXPERIENCE

MyBambu

Salesforce Developer

Jun 2024 – Present

Jul 2025 – Present

- Designed and implemented complex business logic using Apex, Triggers, and Lightning Web Components to streamline and optimize critical financial workflows within a fintech environment.
- Supported integration efforts between Salesforce and third-party systems through REST APIs, including middleware connectivity for account management and Insider platform integration to enable real-time transactional event tracking.
- Supported the migration of marketing automation workflows from Salesforce Marketing Cloud Journeys to the Insider platform, ensuring accurate workflow replication, consistent audience segmentation, and smooth campaign transitions.
- Developed enterprise-wide surveys and data-collection forms using Salesforce Experience Cloud to enhance corporate intelligence processes and reduce manual data-gathering efforts

Junior Data Analyst

Jun 2024 – Jul 2025

- Designed and developed complex, interactive dashboards in Sigma Computing using advanced functions, formulas, and SQL queries to deliver actionable insights supporting strategic decisions.
- Built and maintained data models integrating datasets from the Snowflake warehouse to improve recurring analysis and reporting efficiency.
- Worked on performance optimization for commercial campaigns using Sigma Computing and Salesforce, generating detailed reports that improved customer service efficiency and supported monitoring of key performance metrics such as response time and resolution rate.
- Identified improvement opportunities by analyzing data patterns and contributed to the implementation of tools that enhanced data collection and internal process management.

Developer, Codesa

Mar 2022 – Jun 2024

- Analyzed and estimated technical requirements to ensure accurate project scoping and execution.
- Designed and developed software components, adapting system architecture and UI behavior to business needs.
- Provided advanced technical support for customer-reported incidents and prepared project deliverables for clear alignment with stakeholders.
- Contributed to key technical decisions and developed enterprise applications using Spring (Java 6/8), Angular, JSP, and JavaScript.

Development Consultant, Softka Technologies

Nov 2021 – Jan 2022

- Designed and implemented reactive microservices architectures in Java using Spring Boot, applying Domain-Driven Design (DDD) principles to ensure modularity and maintainability.
- Built reactive, fault-tolerant, and non-blocking services integrated with scalable front-end applications in React.js through RESTful APIs, improving system responsiveness and user experience.

Development Apprentice, Intergrupo

Dec 2020 – Jan 2021

- Gained hands-on experience in building microservices using Spring Boot and Java, contributing to the development of simple, reliable, and maintainable solutions.
- Applied software development best practices and modular design principles to improve code structure and ensure long-term scalability.
- Supported the team with basic development tasks while strengthening foundational skills in backend development within an enterprise environment.

EDUCATION

Politécnico Colombiano Jaime Isaza Cadavid

Associate Degree in Information Systems

Medellín, Colombia

Mar 2019 - Dec 2021

TECHNICAL SKILLS

Backend Development: Java, Spring Boot, Microservices, RESTful APIs, Clean Code, Clean Architecture

Frontend Development: Angular, Lightning Web Components (LWC), HTML5/CSS

Databases & Data Platforms: Oracle, MySQL, Salesforce, Snowflake

Data Visualization & BI Tools: Sigma Computing

Version Control & Project Management: Git, Jira, Confluence, Agile (Scrum)

Languages: Spanish (Native) | English (Intermediate)
